MONTHLY PROFIT SNAPSHOT

Revenue collected	**AED 29,840**
Operating expenses	**AED 12,460**
Net cash balance*	**AED 17,380**

*Illustrative cash view; not accounting profit.

IMPLEMENTATION CHECKLIST FOR ADIT

Suggested minimum viable product (MVP) and reporting rules

1. ORDER & CUSTOMER DATA

- Unique Order ID (auto-generate, with manual search); customer name, mobile, address and notes.
- Category, service type (Standard / Express), amount, pickup and delivery timestamps.
- Order status + payment status stored separately. Allow order edits and track updated time.

2. DAILY OPERATIONS

- Today's pickups and deliveries based on scheduled dates, not the order creation date.
- Overdue deliveries, pending pickups and unassigned / incomplete orders visible immediately.
- Search by Order ID, customer name or mobile; sort by delivery time; export table.

3. PAYMENTS & EXPENSES

- Record order total, discounts, service fee, amount collected, balance and payment method.
- Support unpaid / partial / paid; allow multiple payments against one order if needed.
- Expense form: date, category, vendor / notes, amount, payment mode; editable categories.

4. MONTHLY REPORTS & SLICERS

- Filters: date range, category, service type, order status, payment status (and area if available).
- KPIs: order count, completed orders, revenue, collections, outstanding, AOV, expenses.
- Charts: daily / weekly trend, category split, Express vs Standard, expense categories; Excel / CSV export.

5. SUGGESTED EXTRAS / ACCESS

- Login roles: Admin, Operations, Delivery, Finance; restrict editing by role.
- Mobile-friendly layout, timestamped activity log, backup, and basic data privacy controls.

NOTE: This PDF is a visual concept and feature brief, not a working software dashboard.
